The erection of single garage and store (Retrospective)

The original outline planning application for the development of the site made note of the sensitivity of the site in terms of its proximity to a listed building and the traditional and rural context of the location. This application, which was retrospective, showed a garage and garage door which was inconsistent with material considerations and the context of the neighbouring listed property. The garage was located at the front/side of the property whilst all other garages on this development were located to the rear of the properties and designed to be visually unobtrusive.

Recommend Refusal
